VLADIMIR EGOROV

Ruby on Rails , Ruby - Developer

@ vladimir@verails.tech ⚲ Tbilisi - Georgia ⌨ Vladimire87 in vladimir-egorov-70243a53 ⚲ verails.tech

EXPERIENCE

Chief Operating Officer (COO)
Business Services LLC

📅 Mar 2014 – Feb 2022   📍 Moscow

- Collaborated with cross-functional teams to develop a custom limousine booking platform using Ruby on Rails, enhancing user experience and operational efficiency.
- Defined product architecture and supervised integrations, including payment gateways and responsive web designs.
- Improved platform scalability and increased user adoption by 30% through strategic optimizations.
- Supported the technical team with architectural decisions and ensured on-time delivery of features.

Head of Product
easy2airport.com

📅 Oct 2018 – Feb 2022   📍 Moscow

- Designed a scalable database structure for vehicles, routes, and bookings, enabling seamless future expansions via admin interfaces.
- Spearheaded the development of a dynamic pricing system, streamlining price adjustments for administrators.
- Guided the implementation of an AJAX-powered booking form with real-time data filtering and dynamic calculations.
- Enhanced order management by automating email notifications and implementing unique, user-friendly booking IDs.

TECHNICAL SKILLS

Ruby   Ruby on Rails   HTML & CSS   JavaScript
Git   Bootstrap   Tailwind CSS   SQLite
PostgreSQL   RSpec, Minitest   AJAX
REST API Development   Kamal   Docker

PERSONAL SKILLS

- Strong analytical and problem-solving abilities
- Attention to detail in code quality
- Collaboration in Agile and remote teams
- Adaptability to new tools and frameworks
- Focus on user-centered design and experience

LANGUAGES

- Fluent in English (C1)
- Native Russian speaker

COURSES

The Odin Project
HTML, CSS, JavaScript, Ruby, Rails

📅 2023

Rails Winter 2017
Rails Intensive, Goodprogrammer.ru

📅 2017

RubySchool.us
Ruby and Ruby on Rails

📅 2015

EDUCATION

Academy of Tourism and Hospitality
Bachelor's Degree

📅 2008 – 2012   📍 Moscow

Moscow Academy of Economics and Law
Diploma

📅 2003 – 2007   📍 Moscow

PROJECTS

VERAILS.TECH

- Built a personal blog and portfolio website using Ruby on Rails, featuring custom layouts and responsive design.

WeatherApp

- Developed a lightweight weather application using geolocation APIs to display real-time weather conditions, integrated with Open-Weather API.
- Deployed the application on Render for live testing and production use.

Link Shortener

- Created a URL shortening service using Ruby on Rails, optimizing the database structure for high performance and scalability.
- Designed a simple yet intuitive user interface for sharing and managing shortened links.

GitHub Portfolio

- Additional projects on [GitHub]Vladimire87.
